TECHNICAL INFORMATION

APPLICATION

Please provide us with as much detail as possible about the application you would like to update so that we are able to locate it.

Type of Application: Fish and Wildlife Application
Approximate date that the application was submitted: Aug 6, 2025
Reference Number (tracking number, file number, etc.): 100484922

REASON FOR AMENDMENT

Please provide us with the reason why you would like to update the application (please select all that apply):

Reason for amendment: Correct a mistake in the application

CORRECTION OF A MISTAKE

You have indicated that you have made a mistake in your application. Please explain the nature of the mistake and what corrections you wish to have made. Please be as specific as possible.

Please describe the mistake and how you would like it to be corrected:

Neglected to apply for a variance to the listed Permit Conditions. Specifically Condition 2 - "No electrofishing is permitted between September 15 and June 15 in streams containing bull trout."

We are hoping to sample Tributary To Missinka River wsc - 236-614900-20900-03300 (site 125179) between September 17 - 19 (please see document application_moe.pdf that was submitted with initial application for utms and species details - along with https://www.newgraphenvironment.com/fish_passage_peace_202

4_reporting/trib-to-missinka.html for results of 2024 sampling). This stream was sampled last summer on September 9th with no bull trout captured. Rainbow trout were captured at the site (upstream and downstream of the newly installed bridge our work helped inform/fund) in 2024 and were tagged with pit tags. We are teaming up with McLeod Lake field technicians and some of the staff that we are working with will be certifying for electrofishing on Sept 12 and 15 so will not be available till after then. Through our sampling we hope to gain insight into fish movement from 2024 to 2025 (scan for pit tags) as well as understand fish health (length/weight). Before sampling we will survey areas to be sampled to ensure that no bull trout spawners/redds or suitable gravels are disturbed or sampled. thank you for your consideration. Sorry for the complications

OTHER INFORMATION

Is there any other information you would like us to know?

Hi! Sorry for the hassle on this. We contacted Ian Spendlow regarding this information so he is familiar with the project as well as this amendment. We are hoping that we might receive this permit before next weekend so that we can begin fieldwork then. Sorry for the rush. I will call FrontCounter to see if there are any questions.
