SAMPLING OBJECTIVES

Please describe fish collection component of the project and / or project area - must include:

- Rationale
- Brief description of project/activities:
- Risks associated with project/activities:
- Mitigation measures clearly describing how those risks are avoided or reduced (do not reference other documents)
- Methodologies
- Was there a review of previous baseline information available on the Fisheries Information Summary System (FISS)?
- Are any variances requested? Please include justification and dates if required.
- Any other biological details, information or reasoning to support your rationale.

NOTE: Providing insufficient detail may result in significant delays in processing or even rejection of your application. You are required to obtain separate permits for additional activities not listed.

Please see attached document for objectives as well as details about potential species encountered and the number of fish tagged.

We hope to use the attached memo as part of our application, particularly to provide the rationale for which fish may be present, which will be tagged and associated locational info. This approach will more accurately represent the sampling plan.

As per the submitted 'study plan', tagging is not to exceed a combined maximum of 600 total fish under this permit, by application of passive integrated transponder (PIT) tags in up to 150 fish/stream at priority sites (see attached list - Table 3)
